

Pet: _____

Surgery Form

Plantation Animal Clinic

Type of surgery: _____

As with any surgery requiring general anesthesia, there is a risk that serious complication or even death may result. To minimize the likelihood of such occurrences, we offer the following diagnostic tests prior to anesthesia. All tests are potentially lifesaving, and the value of the test's usefulness increases with the age of the pet. We **strongly** recommend the **Chem2** on all animals over 7 years of age. Every anesthetic patient will have an IV catheter placed prior to any anesthesia for fluid support and administration of medications.

Chem1: Blood test: an analysis of liver, kidney, and health status. **Fee:** \$56.00 Yes No

Chem2: Includes chemistries of above, plus CBC, an analysis of red/white blood cells and platelets. **Fee:** \$88.00 Yes No

Laser Surgery: We offer laser surgery to our patients. This technology allows surgery to be performed more safely with less bleeding, swelling and pain than traditional surgery. This provides your pet with a more rapid and comfortable recovery from surgery. Yes No
Fee: \$67.50

All surgical procedures have some degree of pain associated with them. Rest assured, your pet will be provided with the most advanced pain medication available. This medication may cause your pet to be quite "sleepy" the night after anesthesia.

• We can place an **Identification microchip** in your pet while he/she is under anesthesia. Because this can be a bit painful we prefer to perform this while they are sedated. If done under anesthesia we offer a 15% discount off the regular microchipping cost. (Some of our patients on our special puppy/kitten "packages" will receive this at no charge. PLEASE VERIFY THIS PRIOR TO SELECTING YES) **Fee:** \$34.50 (includes registration fee) Yes No

Previous medical conditions; reactions to medicines or vaccines? _____
 heart condition diabetes allergies pregnancy in heat
(There will be an additional cost of \$67.00 if in heat, pregnant, or overweight.)

Please list any medications your pet is currently taking and when it was last given: _____

I am aware of the risk and understand the rest of the information on this form. I give permission for you to proceed with the surgery.

Signed: _____ **Date:** _____
